Education

University of Colorado Boulder — Boulder, CO
Master of Science in Computer Science, GPA: 3.8/4.0 — Aug 2024 – May 2026

University of Mumbai — Mumbai, India
Bachelor of Technology in Information Technology, GPA: 3.6/4.0 — Aug 2020 – Jun 2024

Experience

Prepify — Remote
Software Development Engineer — Jun 2026 – Present

- Developed an AI-powered meal planning platform using React Native, TypeScript, Node.js, and PostgreSQL, supporting customer, nutritionist, and administrator workflows across 3 user roles.
- Integrated Claude API into backend services to generate personalized 7, 14, and 30-day meal plans based on dietary preferences, allergies, calorie requirements, and budgets.
- Built REST APIs and relational data models connecting personalized meal plans with recipe management and automated shopping lists, implementing validation and error handling.

Running Up For Air — Remote
Software Development Engineer — Aug 2025 – Apr 2026

- Built full-stack features using React, TypeScript, Python, and PostgreSQL for route tracking, checkpoint ETAs, notifications, and reporting workflows.
- Improved application reliability by 40% across 20+ route files through input validation, duplicate-event handling, SQL consistency checks, and failure-state testing.
- Owned features from requirements through implementation and testing, collaborating with an external sponsor to define API contracts, data models, and edge cases.

Amazon Web Services — Seattle, WA
Software Development Engineer Intern — May 2025 – Aug 2025

- Engineered a standalone C++ and Python media decoder microservice with gRPC interfaces and FFmpeg pipelines to support real-time Amazon Transcribe workflows.
- Reduced p99 processing latency by 25% under 16 concurrent clients through performance profiling, streaming pipeline optimization, and concurrency testing.
- Resolved 10+ integration and runtime blockers through root-cause analysis, structured logging, Python validation, regression testing, and Docker environments.

BinaryDots Technologies — Remote
UI/UX Intern, Frontend Developer — Jul 2022 – Sep 2022

- Built 12+ responsive React screens and reduced recurring UI defects by 25% through reusable components, mocked API data, cross-browser testing, and systematic debugging.

Projects

AccessFlow | *React, TypeScript, FastAPI, PostgreSQL, Redis, Docker, AWS ECS, RDS*

- Built a full-stack identity and access management platform supporting 50+ users and 4 role types with authentication, role-based permissions, approval workflows, and audit history.
- Developed React interfaces and FastAPI services backed by PostgreSQL, deploying containerized workloads on AWS ECS with RDS and Redis and validating 40+ authorization and API scenarios.

Triply | *Rust, Axum, Next.js, TypeScript, PostgreSQL, AWS S3, Docker*

- Built a collaborative trip and expense management platform processing 500+ seeded expenses across 20+ group scenarios with shared itineraries, custom splits, receipt uploads, and settlements.
- Achieved sub-200 ms median API latency and prevented duplicate writes across 50+ retry and concurrency tests using idempotency keys, PostgreSQL transactions, and integration testing.

Technical Skills

Languages: Python, C++, Go, Rust, JavaScript, TypeScript, SQL, Java
Frontend: React, Next.js, React Native, Redux, HTML, CSS, Tailwind CSS
Backend & APIs: Node.js, Express.js, FastAPI, Flask, REST APIs, GraphQL, gRPC, WebSockets
Databases & Cloud: PostgreSQL, MySQL, MongoDB, Redis, AWS, GCP, Docker, Kubernetes
Testing & Tools: Git, GitHub Actions, CI/CD, Pytest, Unit Testing, Integration Testing, API Testing, Linux
